

HOW TO USE CREATURE STAT BLOCKS

Creatures in Adventures in Alba are more than numbers, but the numbers help the Guide pace scenes. Every creature has HP, MP, Level, a Difficulty Rating, classic stats, and plenty of story hooks.

Creature rule: every creature has a feeling, a wish, useful stats, and a safe complication.

Creature rolls: when a creature acts against a hero, roll d6 + the creature stat. Use results to create funny trouble, not punishment.

Stat	Creature use
Strength	Push, hold, carry, stomp, protect.
Int	Riddles, tricks, memories, old magic.
Agility	Race, dodge, fly, swim, sneak.
Wis	Feelings, nature, noticing, animal sense.
Luck	Fairy weirdness, charm magic, surprises.

DIFFICULTY RATING

Formula: DR = round((HP + MP + Level×3 + positive stat bonuses×2) ÷ 10). Minimum DR is 1.

DR	Meaning	Use at table
1	Tiny trouble	One adventurer can usually solve it with a good idea.
2	Small scene	Good for a warm-up creature or comic obstacle.
3	Fair challenge	Needs teamwork, a spell, or two rolls.
4	Big scene	Use as the main creature for an adventure.
5+	Boss or wonder	Use rarely; make it emotional, not scary.

Balancing tip: for Adventurers 5–7, “harder” should mean more choices and more wonder, not harsher consequences.

CREATURE STAT BLOCK

MOON-KELPIE FOAL

A nervous water-pony adventurer with a kelp mane and a moon-bell collar. It wants to be brave but splashes when startled.

It circles moonlit shallows where lost songs sink. If heroes speak gently, it lowers its head so the bell-shaped mark on its collar can be seen. It is not trying to block the path; it is afraid the loch will forget bedtime.
