

How to use this book

1. Choose who helps as the Guide.
2. Make a hero in five easy steps.
3. Use Strength, Int, Agility, Wis, or Luck when a roll is exciting.
4. Keep the story warm: heroes can be muddy, surprised, or silly, but never shamed.

Table feel: point at the picture, ask what the hero notices, then roll only when it is exciting.

For Adventurers 5–7: read choices aloud, let adventurers point to pictures, and use small bonuses (+2, +1, +0) instead of lots of maths.

What you need

- One six-sided die.
- A pencil, character sheet, and three little counters.
- A grown-up or older sibling Guide.
- A promise to listen and take turns.

What players say

- “I help.”
- “I try the brave thing.”
- “Can I talk to it?”
- “I look closer.”
- “Can my friend help?”

First table promise

Every player gets a turn to say one idea before the dice decide anything.

THE EASY DICE RULE

When the answer is obvious, no roll is needed. When everyone leans forward and wonders what might happen, roll one six-sided die and add the hero's matching stat bonus.

Total	Result	Say it like this
1–3	Wobble	It goes wrong in a funny, safe, or messy way.
4–5	Yes, but...	It works, and there is a tiny cost or choice.
6+	Bright success	It works well, and the hero feels proud.

No failure spiral: a wobble changes the scene; it does not stop the adventure.

The five classic stats

- **Strength** — lifting, climbing, holding, pushing, protecting.
- **Int** — puzzles, facts, plans, reading runes, remembering.
- **Agility** — sneaking, dodging, catching, balancing, jumping.
- **Wis** — feelings, animals, nature, noticing, sensible choices.
- **Luck** — charms, surprises, odd magic, last-chance moments.

When not to roll

- The action is safe and obvious.
- An adventurer is only describing how they look or feel.
- The group already found a kind solution.
- A roll would slow a warm moment.

Helping rule

If another hero clearly helps, add +1 or let the adventurer roll again and choose the better die.

STAT CREATION: CLASSIC FIVE STATS

1. Strength

Lifting, climbing, holding, pushing, protecting.

2. Int

Puzzles, facts, plans, reading runes, remembering.

3. Agility

Sneaking, dodging, catching, balancing, jumping.

4. Wis

Feelings, animals, nature, noticing, sensible choices.

5. Luck

Charms, surprises, odd magic, last-chance moments.

Assign bonuses: choose one best stat at **+2**, two good stats at **+1**, and two normal stats at **+0**.

Worked example: Rowan the Beast Friend has Wis +2, Agility +1, Luck +1, Strength +0, Int +0.

HP, MP, AND RESTING

Heart Points (HP)

HP shows how much bumping, slipping, startling, and tiring a hero can handle before they need a rest. Heroes are never described as badly hurt; low HP means muddy, shaken, sleepy, or overwhelmed.

Level	Hero HP	Hero MP
1	10 + Strength	6 + Wis or Luck
2+	+2 HP each level	+1 MP each level

Magic Points (MP)

MP fuels adventure spells. Cantrips cost 0 MP. Most spells cost 1 MP; bigger story spells cost 2 MP if the Guide allows them.

Resting

- **Snack rest:** after a quiet snack, regain 2 HP and 1 MP.
- **Safe camp:** after a full rest, regain all HP and MP.
- **At 0 HP:** the hero sits out one tense moment, then returns with 1 HP when a friend helps.

Gentle rule: HP is pacing, not punishment. Adventurers should feel worried for the hero, not scared for themselves.

LEVELING AND FEATS

Level	What changes	What to say
1	Choose kindred, job, stats, cantrip, gear.	"This is who I am at the start."
2	+2 HP, +1 MP, learn one new spell or tool trick.	"I learned from the road."
3	Improve one +0 stat to +1.	"I practised something hard."
4	+2 HP, +1 MP, choose one feat.	"I have a special talent."
5	Improve one +1 stat to +2, learn one spell.	"I am growing into a hero."
8	Choose another feat.	"My legend gets bigger."

Feats every 4 levels

Stout Heart

+3 HP. Once per session, stand back up with 1 HP after a friend cheers you.

Deep Spark

Lucky Pocket

Once per session, spend a copper, button, or charm to reroll Luck.

Helpful Friend

When you help another hero, they gain +2 instead of +1.

Relic Bearer

At level 8+, carry one extra enchanted item without trouble.

SKILLS AND CHECKS

What is a skill?

A skill is a thing an adventurer knows how to try. Skills do not add extra numbers. They tell the table which stat makes sense and what tools might help.

Skill	Usual stat	Example
Climb / Hold	Strength	Hold a rope while friends cross.
Riddle / Rune	Int	Read fairy marks on a gate.
Sneak / Dodge	Agility	Step around creaky roots.
Notice / Soothe	Wis	Calm a frightened creature.
Charm / Chance	Luck	Trust a lucky button at the last second.

How checks work

- Say what the adventurer tries.
- Pick the stat that matches the method, not the problem name.
- Add +1 if gear or a friend clearly helps.
- Roll d6 + stat bonus only if the answer is exciting.
- On a wobble, move the scene forward with a cost, noise, mess, or choice.

Trap example: A twig-bell trap can be Agility to step over it, Int to disarm it, Wis to notice it, Strength to hold a branch aside, or Luck to bump it in a harmless way.

COMBAT AND DANGER

Combat is a tense scene

Combat in Adventures in Alba is not about hurting enemies. It is about protecting friends, dodging trouble, tiring a creature out, breaking a spell, or helping something stop being scary.

1. The Guide describes danger and feeling.
2. Each adventurer says one action.
3. Roll only for exciting actions.
4. Reduce HP when someone is bumped, tired, scared, tangled, or splashed.
5. At 0 HP, a hero needs help; a creature stops fighting and can be soothed, tricked, or understood.

Combat actions

Action	Stat	On success
Protect a friend	Strength	Friend avoids 2 HP of trouble.
Dodge claws, roots, or falling stones	Agility	You avoid harm and move somewhere useful.
Spot the weak point in a spell	Int	Next hero gets +1.
Calm or distract	Wis	Creature loses 1 MP or changes feeling.
Use a charm	Luck	Turn a bad moment into a funny cost.

Damage guide: small bump 1 HP, scary hit or trap 2 HP, boss special 3 HP. Keep descriptions safe: muddy, tangled, dizzy, startled, sleepy.

TRAPS, OBSTACLES, AND GEAR

Traps are puzzles with a warning

Use traps as playful obstacles: bell strings, sleepy roots, sticky jam doors, rune locks, puddle mirrors, or a bridge that sneezes. Always give a clue before a trap matters.

Trap	Notice	Checks
Twig-bell alarm	Tiny bells in moss	Wis notice, Agility step, Int untie.
Sleepy root snare	Roots yawn quietly	Agility hop, Strength pull, Wis sing awake.
Moon-rune lock	Cold silver letters	Int read, Luck button, MP Rune Read.

Equipment matters

Gear	Helps with	Table effect
Rope	Climb, rescue, measure.	+1 when it clearly helps.
Lantern	Dark, mist, caves.	Reveals one clue before a roll.
Chalk	Maps and marks.	Prevents getting lost once.
Tiny toolkit	Locks and repairs.	Allows Int checks on devices.
Oat pouch	Animal trust.	+1 Wis with hungry creatures.

Gear question: “What do you pull from your pack, and how does it help the adventurer?”

EXAMPLE SCENARIO: ADVENTURER VIEW

The Bell-Root Path

You see: a path of soft moss, tiny silver bells tied to roots, and a sleeping fox curled beside a moon-rune door.

You feel: the place is quiet, like it is holding its breath.

Your choices

- Step carefully between the bells: Agility.
- Study how the bells are tied: Int.
- Whisper to the fox and ask what it knows: Wis.
- Hold the branch up for a friend: Strength.
- Tap your lucky button and choose the quietest root: Luck.

If things go wrong

- Wobble: one bell rings and the fox opens one eye.
- Yes, but: you pass, but your cloak snags a root.
- Bright success: you reach the moon-rune door and find a silver acorn key.

Adventurer tip: describe the idea first. The stat comes after everyone understands what your hero is doing.

EXAMPLE SCENARIO: ADVENTURER COMBAT

The Bramble Sneak jumps out

A red-capped bramble creature shakes thorns and hisses, “No one takes my shiny bell!” It looks more scared than mean.

Adventurer turns

- Knight: protect a friend with Strength.
- Scout: dodge through roots with Agility.
- Bard: sing a silly rhyme with Wis.
- Mage: spend 1 MP on Glow-Pebble to show the bell is not stolen.
- Tinker: use Int to spot the bramble knot holding its cap too tight.

How it ends

When the Bramble Sneak reaches 0 HP, it is not defeated forever. It is tangled, tired, and ready to listen. If the adventurers offer the bell back or promise a new shiny button, it becomes a grumpy guide.

Reward: the Bramble Sneak shows a shortcut under the thorn arch and gives one copper it thought was a magic moon.

SPILLS, GEAR, AND TREASURE

Rule: magic helps the story; it does not solve every problem alone.

Safe little spells

- **Glow-pebble:** make a small light.
- **Tea-steam:** warm cold hands or reveal a breeze.
- **Thistle-tickle:** distract a grumpy creature for a moment.
- **Kind whisper:** help someone say what they feel.
- **Button-bridge:** make a tiny bridge for one small creature.
- **Heather-hush:** quiet a noisy room for one careful question.

Spell limit

A spell can help one small problem. Big problems still need friends, ideas, and choices.

Starting gear

- A snack wrapped in cloth.
- One useful tool.
- One pretty charm.
- One thing your hero drew themselves.
- A spare ribbon, button, bell, shell, or smooth stone.
- A tiny notebook for clues or doodles.

Useful tools

Tool	Use
Lantern	See misty paths.
String	Tie, measure, or rescue.
Chalk	Mark a safe way back.
Wooden cup	Offer water, tea, or kindness.

Treasure prompts

Find	Story use
Silver button	Opens a promise gate.
Ribbon	Marks a safe path.
Bell	Calls one fairy friend.

Treasure is story-first: a shiny button can matter more than a bag of coins if it unlocks a promise.

SPELL LIST

Heather-Hush	Wis	0 MP	Quiet one noisy room long enough for a careful question.
Thistle-Tickle	Luck	0 MP	Distract a grumpy creature for one moment.
Kind Whisper	Wis	0 MP	Help someone say what they feel.

MAKING A HERO: QUICK CHECKLIST

1. Name your hero.
2. Pick a kindred.
3. Pick an adventure job.
4. Choose stats: one +2, two +1, two +0.
5. Pick one gear item and one charm.
6. Answer: “Who do I want to help?”

Worked example: Rowan Moonbutton is a Selkie-Born Beast Friend. Stats: Wis +2, Agility +1, Luck +1, Strength +0, Int +0. Gear: oat pouch. Charm: sea-glass button. Rowan wants to help nervous animals.

Grown-up tip: do not quiz an Adventurer on rules. Ask what they imagine, then translate that into Strength, Int, Agility, Wis, or Luck.

Explorer	Lantern, chalk, soft boots.

If a player is stuck

Offer two choices: “Do you want to talk kindly, move quickly, or do the brave thing?”

If the group gets loud

Point to the picture, name one sound in the scene, then ask one adventurer what their hero notices.

Background rule: once per session, if your background clearly helps, add +1 or ask the Guide for one extra clue. Pets use the companion rules on the next page.

EARNED MOUNTS AND PETS

Companion rule

Mounts and pets are story friends, not shopping items. Earn one by helping it, keeping a promise, or finishing a quest. A companion never replaces a hero; it opens one extra approach.

- One companion may actively help the party in a scene.
- If it clearly helps, add +1 or reveal one clue before a roll.
- If danger targets it, the Guide offers a rescue choice instead of punishment.
- A companion needs care: food, rest, kindness, and a job it enjoys.

Earned, not bought: coins can buy tack, feed, or shelter, but trust must be won in play.

Companion	Earn by	Helps with

MORE MAGIC: SCHOOLS AND RITUALS

Four gentle spell schools

Schools are story flavors, not homework. Use them to describe how magic looks, sounds, and asks for promises.

School	Feels like	Examples
Hearth	warmth, light, mending	Glow-Pebble, Tiny Mend
Loch	mist, water, memory	Mist Step, Moon Reflection
Thistle	protection, brambles, courage	Shield of Thistles, Prickle Path
Story	songs, names, promises	Courage Note, Name Echo

Rituals

A ritual is a slow spell that takes a scene, a promise, and three ingredients. It usually costs 2 MP from the group instead of one hero.

- Name what you want: light, bridge, truth, calm, memory.
- Offer three ingredients: coin, feather, song, button, water, ash, berry.
- Every adventurer says one helpful line.
- Roll Wis, Int, or Luck if the answer is exciting.

Ritual mishap: on a wobble, the ritual works but leaves a funny sign: purple hair, hiccuping bells, sleepy shoes, or talking moss.

Spell Upgrades

Level	Upgrade choice	Example
2	Longer light	Glow-Pebble lasts a whole scene.
3	Friend boost	A cantrip can help a nearby friend.
4	Feat spell trick	Choose one spell feat when you gain a feat.
5	Big ritual	Group rituals can affect a bridge, grove, or cottage.

Spell feat: Careful Magic

Once per session, when you spend MP, ignore the first harmless magical mess.

Spell feat: Shared Spark

Spend 1 extra MP so a friend also gets +1.

Spell feat: Bright Cantrip

Pick one cantrip. It can affect two tiny things instead of one.

Spell feat: Old Words

You may ask the Guide what one rune, rhyme, or fairy name means.

Spell feat: Potion Nose

You can identify a potion, poison, or enchantment ingredient by smell once per session.

Spell feat: Rune Stitcher

You may repair one damaged charm during a safe camp.

ADVANCED COMBAT OPTIONS

Armor and shields

Gear	Cost	Rule
Padded cloak	4 silver	Once per scene, reduce 1 HP of trouble.
Wooden shield	6 silver	Protect a friend at +1 if you can reach them.
Thistle charm	1 gold	Reduce one bramble/spell trouble by 1 HP.

Conditions

Condition	Means	Ends when
Tangled	You need help to move far.	Strength, Agility, or a friend helps.
Startled	Next roll is -1 unless soothed.	Friend says something kind.
Sleepy	You can act, but slowly.	Snack, song, or fresh air.
Glittered	Easy to spot.	Wash, cloak, or scene ends.
Poisoned	A venom causes a temporary condition.	Use the listed cure.
Cursed	A spell changes the scene rules.	Break the rune, oath, or item.

Boss phases: at half HP, a boss changes the scene: fog rolls in, bridge wakes, or the creature admits what it truly wants.

Battle complications

- Falling stones split the party into two zones.
- A banner gives enemies +1 until cut down.
- A poison cloud makes everyone seek clean water.
- A frightened monster grabs a map instead of a hero.

ENCHANTMENTS AND MAGIC ITEMS

Enchanting rule

- Choose a plain item: blade, cloak, ring, harp, lantern, boots, spoon, shield.
- Choose one enchantment word: Bright, Thorn, Loch, Cairn, Storm, Rowan, Moon, Ember.
- Pay the ingredient cost and make a promise about how the item will be used.
- Enchanted items add +1 only when the story clearly matches their word.

Limit: carry one active enchanted item per level. Mythral items count as two.
